

Distributed roughness helps in every cell, and least where the manuscript says it acts

○ uniform roughness (control)    ● Baptist 153    ● Baptist 154    ● [veg] module

† in this cell the 153 entry is the ORIGINAL member, whose .arl reached 5.5% of the meadow: 153 with the meadow correctly applied aborts here, so no corrected 153 exists to compare against.
